# AVIGILON UNITY CLOUD SERVICES PLATFORM

An end-to-end platform for your on-premise video and cloud-managed solutions

With cloud-managed Avigilon Unity Video software, leverage role-based access control (RBAC) for your large sites with Unity Privilege Management, available within Unity Cloud Services. Gain single login credentials for on-premise, mobile and cloud-managed features of Unity Video and enjoy a seamless and secure login experience.

Experience easy access to camera feeds and manage camera settings from a single interface, regardless of location – whether from the office or on-the-go using a mobile device. Real-time notifications keep you informed of potential issues, enabling instant action.

### EASY REMOTE ACCESS

Monitor multiple locations and cameras – from a central location or via a mobile app – to quickly detect, verify and act on events.

### SINGLE LOGIN CREDENTIAL

Enjoy simple and hassle-free management of all aspects of your video management system with a single, unified login.

### UNITY PRIVILEGE MANAGEMENT

Configure roles, user groups and policies and map those to devices across the Unity Video servers on all sites using a harmonized privilege model.

### CONVENIENCE WITH THE CLOUD

Easily access to camera feeds and manage settings from a single interface, regardless of location – whether from the office or on-the-go using a mobile device.
