

# Rave Panic Button

Expedite urgent communications

Rave Panic Button is a leading emergency notification and response solution delivering instant connection to first responders with the push of a button. The Panic Button connects to on-site personnel, first responders and those involved to keep everyone informed and engaged throughout a situation.

## Faster response

One-push activation of an emergency initiates two-way communication with 9-1-1, first responders and on-site personnel to enable a faster and more coordinated response.

## Efficient communication

Staff Assist enables authorized employees to communicate with on-site groups or individuals without initiating an emergency call to 9-1-1.

## Designed for ease of use

Connect from anywhere to monitor and manage situations with the browser-based and mobile-responsive system. The mobile app offers a simple and user-friendly interface.

## Streamlined security

Connect radios, cameras, video management and access control into one physical security solution by integrating with Motorola Solutions' technology ecosystem.

## Stay informed on all activity

Get complete visibility into every panic button activation for internal stakeholders and 9-1-1, including location, incident type and facility data.

## Reliable solution

FirstNet Verified and US Department of Homeland Security SAFETY Act Certified.
